## Performance & Commentary

The NAV was up 54bps this month to £116.72 which gives a one year performance of the fund's net asset value of 6.18%. Out of the total assets of the fund, 92.4% were invested in secured loan notes at the end of the month with a gross weighted average yield of 8.18%.

The portfolio is kept very liquid with 6% in cash and 81% invested in notes maturing within 2 years. The fund has regular opportunities for re-investment through LGB's existing loan note programmes.

The fund continues to hold some small legacy AIM positions, currently 1.4% of the total fund, which it seeks to exit opportunistically. It is the intention that the fund will invest only in loan note issues going forward.

## UK Tax Reporting

Upon a realisation or other disposal of shares UK resident investors are liable for income tax on any increase in NAV. There are no UK tax reporting requirements for a tax year in which there have not been any disposals of shares.

## Risk Factors

The fund seeks to reduce portfolio risk through diversification of investments, robust security arrangements in the terms of loan notes and limited investment in shares on AIM. However, investors should note that:

- There is no market for loan notes and liquidity is limited on AIM. Consequently, investors may experience delays in redeeming shares if redemption requests exceed the cash resources of the fund.
- Loan notes may experience events of default, in which case the fund may incur a capital loss or be required to enter a re-structuring process to recover its capital.
- AIM quoted shares can experience significant price fluctuations at times of market volatility or upon the announcement of company specific developments. These may affect the NAV of the fund.
